

PacknWood is known for bringing new products and innovations to the food service industry. With its expert teams, PacknWood products address various challenges, including sustainability, waste, and aesthetic presentation. We continue to innovate new solutions that align with the latest legislative compliance requirements, eco-friendly values, and shifts in consumer expectations.

We have added new packaging solutions to our catalog, such as single use food-safe containers and reusable accessories for cooking, serving, transport, and meal presentation. These products feature classic materials, including metal, glass, and porcelain, as well as new and innovative composite materials, such as compostable and biodegradable products and sustainable plastics. Plus, we still offer traditional food service products loved by generations, such as enameled steel and ceramics.

To go even further, PacknWood uses an ISO 14001 approach. This initiative is based on the principle of continuous improvement of environmental performance by controlling the impact of a company's activities. After completing our first carbon assessment, we implemented actions to reduce our footprint as much as possible. We propose sustainable, beautiful, and forward-thinking solutions for the future. So whether your strategy is to sell on-site, takeaway, catering, or to implement a deposit policy in your store, we will find the solutions and advice you need to support you in your approach.

Adam Merran
CEO
Packnwood

REUSABLE RANGES MATERIALS

BAMBOO

Bamboo is the fastest growing plant on the planet, growing as large as 24 inches every night. Needing very little water to do so and absolutely zero chemicals. It is 100% biodegradable. One of our most popular materials, we turn it into sturdy and stylish serving dishes, cutlery, and skewers.

WOOD

PacknWood cultivates the best wood from specially curated forests located all over the world. We systematically grow our trees to make our products and we replace every tree we use. Whether it is birch, poplar or pinewood, our extensive line of wood products will add a smooth and sophisticated touch to your tableware presentation.

ENAMEL

Enamel is a reusable, food safe material that's perfect for restaurants, hotels, butchers, and caterers looking for an elegant, long-lasting solution for service. Many enamel pieces can be used in the oven, so they serve double-duty in kitchen environments.

METAL

Washable and infinitely reusable, metal is one of the key materials of the range. Light and economical aluminum, stainless steel offers great durability and temperature resistance.

PORCELAIN

Porcelain is made from more refined clay and it's fired at higher temperatures. This makes it denser. It is usually very white and translucent, meaning you can see light through it. With its translucence in mind, porcelain is typically reserved for display or special occasions.

GLASS

The reusable double-wall glass products we offer are made of borosilicate glass and are very well designed and trendy. As they are very resistant to thermal shock, double-wall glass helps maintain food temperature for a longer period of time.

COTTON /BURLAP

There are no chemicals used in the manufacturing of jute, which is an ecological fiber. The products made of cotton are washable and reusable

WOOD COMPOSITES

The natural world is full of resources that can be used without extensive transformation, such as straws, reeds, and coconuts. Plant materials are mechanically transformed without being chemically treated. Additionally, materials like straw and coconut come from elements left over in crops for food so as not to waste them.

PET REUSABLE

Our bottles and other clear products are manufactured from polyethylene terephthalate, which is a plastic derived from fossil fuels, such as natural gas. The recycling capabilities of PET make it an environmentally friendly material that leaves the smallest possible footprint.

TRITAN

Tritan is the ideal, BPA-free reusable plastic container that's meant to last. This longevity and sturdiness mean these containers won't end up in the landfill since you'll use them over again. Tritan is clear, odor-free, and stain-resistant.

PP REUSABLE

The durability and transparency of PP products make them ideal for long-term use.

WHY CHOOSE PACKNWOOD?

- ✓ Eco-Friendly Disposable and Reusable Foodservice Solutions
- ✓ CO2 Neutral
- ✓ Perfect for Sampling/Tasting/ Cocktail Events
- ✓ Made out of Renewable Resources
- ✓ 🌱 Sugarcane, 🌱 Bamboo, 🌳 Wood, and 🌴 Palm Leaf material options
